STORING EZ-IO POWER DRIVER IN THE VASCULAR ACCESS PACK (YELLOW CASES) MAY CAUSE ACCIDENTAL ACTIVATION OF DRIVER RESULTING IN A DRAINED BATTERY*

RECOMMENDATION: Remove the trigger guard when using the Vascular Access Pack to prevent accidental activation of the EZ-IO power driver.

*The compartment designated for driver storage is tight and has been known to cause activation of the driver from pressure on the trigger guard. Please remember to check driver function when checking your equipment to assure this has not occurred.
