

# How to Register an Outof-Hospital Birth

Dear Parents:

Congratulations to you and your newborn baby!

Ventura County Office of Vital Records wants to help you register your baby's birth and get a birth certificate. We are offering this help because you did not give birth in a hospital – where hospital staff would have registered the birth. If a physician or certified nurse midwife / licensed midwife attended the birth they are responsible to complete the worksheet provided in this packet.

Please read this pamphlet very carefully. It will walk you through the process of registering your baby's birth.

This pamphlet includes a worksheet that must be completed by the physician or certified nurse midwife / licensed midwife who attended the birth or the parents if the birth was unattended.

Health and Safety Code Sections (HSC) 102400 and 102415 require that you register the birth of this child with the local registrar within twenty-one (21) days of the birth. Please submit the worksheet as soon as possible to allow for timely registration.

Rev 1/30/2024

# Information for Physicians and Professionally Licensed Midwives or Certified Nurse-Midwives

Dear Physician or Professionally Licensed Midwife or Certified Nurse-Midwife:

The Ventura Department of Public Health-Vital Records understands you recently attended the birth of a child outside of a hospital or state-licensed alternative birth center. Health and Safety Code Sections (HSC) 102400 and 102415 require that you register the birth of this child with the local registrar within twenty-one (21) days of the birth.

- 1. Please review this pamphlet and complete the enclosed worksheet documents. Work with the parent(s) of the child so they can help gather the required information.
- 2. Contact us at 805-981-5172 for information on the registration process and to schedule an appointment.
- 3. Email the worksheet documents to birth.desk9815140@ventura.org for review and to prepare the birth certificate and generate the birth certification page. You will sign the birth certification page as the attendant. You will be required to present valid government-issued photo identification and your current professional license number to the local registrar for verification. If you are not currently licensed as a physician, certified nurse-midwife, or licensed midwife, you cannot register the birth. Births attended by unlicensed individuals must be registered by the parents.
- 4. Please advise the parents that they need to visit the local registrar if they will sign the birth certificate as an informant. Parents will be required to present valid government-issued photo identification to the local registrar for verification. Although VCPH-VR suggests that the parents sign the certificate at the time of the appointment, the local registrar can make a separate appointment for the parents.
- 5. Please advise the child's parents that if they are not married to each other or in a State-Registered Domestic Partnership with each other, the non-birthing parent shall not be listed on the birth certificate unless the parents sign a Voluntary Declaration of Parentage before the birth certificate is registered. Local registrar staff are authorized witnesses for the Voluntary Declaration of Parentage. The birth certificate may be amended to add another parent's name at a later date only if parentage for the child has been established by a judgment of a court or by the filing of a voluntary declaration of parentage (HSC 102425). For information on the Parentage Opportunity Program, call (916) 464-1982, email askpop@dcss.ca.gov, or visit their website

(https://childsupport.ca.gov/establishing-legal-parentage/).

The birth will not be registered until all signatures are in place. By law, the birth certificate must be registered within twenty-one (21) days of the birth (HSC 102400). Thank you for your help in registering the birth of this child.

# **Information for Parents**

# Dear Parents:

Congratulations on the birth of your new baby!

Ventura Department of Public Health-Vital Records wants you to have information on registering your baby's birth so you can obtain their birth certificate. VCPH-VR is providing this information because you did not give birth in a hospital or licensed birth center, where staff would have prepared the birth record and submitted it to the local registrar.

- 1. Determine who is responsible for registering your child's birth:
  - a. If a physician or professionally licensed midwife or certified nurse-midwife attended the birth of your child, they are responsible for registering the birth with the local registrar within twenty-one (21) days of birth. Please review this pamphlet and work with your birth attendant to complete the enclosed worksheet documents. Parents need to visit the local registrar if they will sign the birth certificate as an informant. Parents will be required to present valid government-issued photo identification to the local registrar for verification.
  - b. If your child's birth was not attended by a physician or professionally licensed midwife or certified nurse-midwife, you are responsible for registering the birth with the local registrar within twenty-one (21) days of birth. Births attended by unlicensed individuals must be registered by the parents. Please review this pamphlet, complete the enclosed worksheet documents to ensure your child's birth certificate is completed correctly, and contact our office at 805-981-5172 for information on the registration process and to schedule an Appointment.
- 2. If a child's parents are not married to each other or in a State-Registered

Domestic Partnership with each other, the non-birthing parent shall not be listed on the birth certificate unless the parents sign a Voluntary Declaration of Parentage before the birth certificate is registered. Local registrar staff are authorized witnesses for the Voluntary Declaration of Parentage. The birth certificate may be amended to add another parent's name at a later date only if parentage for the child has been established by a judgment of a court or by the filing of a voluntary declaration of parentage (HSC 102425). For information on the Parentage Opportunity Program, call (916) 464-1982, <u>email</u>

# askpop@dcss.ca.gov, or visit their website

(https://childsupport.ca.gov/establishing-legal-parentage/).

Complete the worksheet accurately with the facts of birth before the appointment with the local registrar. The information on the worksheet will be used to prepare the baby's birth certificate. HSC 102425 requires that all items be completed or accounted for, including the public health data portion of the worksheet.

If the birth was attended by a physician or professionally licensed midwife or certified nurse-midwife, they must complete form VS 10A, which provides supplemental medical information.

# **Evidence of Live Birth in California**

If a physician or professionally licensed midwife or certified nurse-midwife attended the birth, they must register the birth, and the parents only need to provide proof to substantiate the identity of the parent(s). If the birth was not attended by a physician or professionally licensed midwife or certified nurse-midwife, the parents need to provide proof to substantiate all five facts.

Please bring to your appointment evidence to substantiate these five facts:

- 1. Identity of the parent(s)
- 2. Pregnancy of the person giving birth
- 3. Baby was born alive
- 4. Birth occurred in Ventura County
- 5. Identity of the witness (if applicable)

# Fact 1: Identity of the Parents

A valid picture identification card issued to the parents by a government agency can be provided to prove identity. Following are some recommended documents that can be used (only the original or a certified copy is acceptable):

- A driver's license or identification card issued by a United States (U.S.) Department of Motor Vehicles Office.
- U.S. passport.
- U.S. military identification card.
- Permanent Resident Card (Green Card).
- Other valid picture identification card issued by a foreign government. (If the parents gave birth in California but are not here legally, they may be able to obtain identification verification from their consulate.)

# Fact 2: Pregnancy of the Person Giving Birth

To substantiate the pregnancy of the person giving birth, the parents may provide a pregnancy test verification form or a letter that meets all of the following conditions:

- From a physician, professionally licensed midwife or certified nurse-midwife, or clinic.
- Written on the doctor, midwife, or clinic official letterhead (not on a prescription pad).
- Signed (not stamped) by the doctor, midwife, or clinic representative or nurse.
- Contains the current issued professional license number of the physician or midwife who signed the letter.

The pregnancy test verification form or letter must include all of the following information:

- The name of person giving birth.
- The date when the person giving birth was first seen by the doctor or midwife (this date may be after the date of birth).
- The results of the person giving birth's prenatal or postpartum exams or pregnancy tests.
- The date of the person giving birth's last menstrual period.
- The date the baby was born, or was expected to be born (due date).

# Fact 3: Baby was Born Alive

The parent must provide proof that the child was born alive if there was no physician or professionally licensed midwife or certified nurse-midwife that attended the birth. Suggested methods of proving live birth include, but are not limited to:

1. Bringing the baby to the appointment, the appointment will not be conducted if the baby is not present.

**If birth was unattended by a licensed physician or midwife, the following is required:** Hospital/Pediatrician's medical summary on letterhead (not on a prescription pad) from a visit within the first 30 days. The original summary with original MD signature must state the following:

- Date the child was born
- Baby's health conditions
- · Baby's weight at the time of the visit
- The Child's complete name and address
- MD License number

If the evidence provided is suspected to be fraudulent, the local registrar staff can decide on a case by case basis if more information is necessary to make the birth certificate complete before acceptance for registration.

# Fact 4: Birth Occurred in Ventura County

The local registrar needs information showing that the person giving birth was in Ventura County on the date that the birth occurred. Documentation to confirm the person giving birth's presence in Ventura County on the date the birth occurred may include any of the following:

• If the birth occurred at the person giving birth's residence, provide an electric power, natural gas, or water bill for the period when the birth occurred. The copy

of the bill (or statement from the company) must include the name of the utility company, the address of the residence where the birth occurred, and the name of either parent who is listed on the birth certificate.

- An affidavit (notarized statement) from someone who was with the person giving birth at the time of the baby's birth. The affidavit must contain the address of the person with the person giving birth, and the location of the birth.
- A current rent receipt or other similar document that shows the name of either parent and current address.
- A statement from a state or local government agency that requires proof of residency in California that the person giving birth was receiving services on the date of the baby's birth (e.g., WIC or Medi-Cal)

# Fact 5: Identity of the Witness (if applicable)

It is not mandatory for the witness to accompany the parents to the appointment if there was no physician or certified nurse-midwife/licensed midwife that attended the birth. However, if the parents are using a witness to prove any of the other facts, then the witness needs to accompany the parents to the appointment to prove their identity. A witness may include any of the following:

- Spouse or other family member
- Friend
- Paramedic or fire department staff

If a paramedic or fire department staff was present at the birth, you can obtain a copy of the official report stating the treatment or service they provided (there may be a fee for the report). The staff does not have to be present at the appointment, nor do you have to bring a copy of their identification.

If the paramedic arrived after the baby's birth, bring a copy of the 911 call or an official report of the contents of the 911 call, along with a copy of the paramedic's report.

- If the paramedic cut the umbilical cord, or was present when the umbilical cord was cut, the report should so state.
- If the paramedic delivered the placenta, the report should so state.

**Valid ID for Witness:** A valid picture identification card issued to the witness by a government agency must be provided to prove identity. Following are some recommended documents that can be used (only the original or a certified copy is acceptable):

- A driver's license or identification card issued by a United States (U.S.) Department of Motor Vehicles Office.
- U.S. passport.
- U.S. military identification card.
- Permanent Resident Card (Green Card).
- Other valid picture identification card issued by a foreign government. (If the witness is not in California legally, they may be able to get identification verification from their consulate.)

# Verification

The local registrar may verify the accuracy of all information provided to register an outof-hospital birth.

# Local Registrar's Duty to Register

There is no legal authority for the local registrar to refuse to register the birth certificate. However, the local registrar is allowed to request additional information until they are satisfied the record is suitable for registration. HSC 102305 states, "The local registrar of births and deaths shall carefully examine each certificate before acceptance for registration and, if any are not completed in a manner consistent with the policies established by the State Registrar, he or she shall require further information to be furnished as may be necessary to make the record consistent with those policies before acceptance for registration."

# **Frequently Asked Questions**

# Who is required to register out-of-hospital births?

When a baby is born outside a hospital, the physician or certified nursemidwife/licensed midwife who attended the birth is responsible for registering the birth with the local registrar in the county where the birth occurred (HSC 102415). If the outof-hospital birth was not attended by a physician or professionally licensed midwife or certified nurse-midwife, either one of the parents is responsible for registering the birth.

## When must out-of-hospital births be registered?

By law, births must be registered with the local registrar within twenty-one (21) days of the birth and accepted up to one year from date of event (HSC 102400 California Code of Regulations 17 CCR § 908). There is no fee to register the birth with the local registrar within the first year.

Any birth registered on or after the child's first birthday must be processed by CDPH-VR as a Delayed Registration of Birth. If the requirements cannot be met for a Delayed Registration of Birth, another option is to apply to the local Superior Court for a Court Order Delayed Registration of Birth. More information on these processes is available at the following link:

## Correcting or Amending Vital Records

(https://www.cdph.ca.gov/Programs/CHSI/Pages/Correcting-or-Amending-Vital-Records.aspx)

# Why do births need to be registered?

All births need to be registered to comply with state law. The birth must be registered before a certified copy of the birth certificate can be obtained. During a child's life, they will need a certified copy of their birth certificate to:

- Obtain a Social Security Number
- Apply for a Driver's License
- Enroll in School
- Travel or Obtain a Passport
- Register to Participate in Sports
- Apply for Various Benefits (Social Security, Military)

Birth certificates are also valuable to establish:

- Proof of Parentage
- Inheritance Rights
- Identity
- Citizenship

# How can I make sure the birth certificate is completed correctly?

Ensure that the worksheet documents are completed fully with accurate information, as this information is used to create the birth certificate. The local registrar will print a working copy of the birth certificate for you to review. Please review the entire working copy of the baby's birth certificate for accuracy before signing the Birth Certification

# Information to Help Register Out-of-Hospital Births

Page. If there are any errors, inform the local registrar immediately. Once the record has been registered, any corrections, such as misspellings or omissions, must be made through CDPH-VR, the amendment may be a second page of the birth certificate, and a fee may be charged. The <u>processing time</u> for amendments can be located on the CDPH-VR website (https://www.cdph.ca.gov/Programs/CHSI/Pages/Vital-Records-Processing-Times.aspx).

## Am I required to complete all information on the worksheet?

All information is required by law, except for the following fields, which apply to both parents. Although not required, this information is very important for understanding pregnancy outcomes and developing needed programs.

- Race and Ethnicity
- Education
- Usual Occupation
- Usual Kind of Business or Industry
- Social Security Numbers
- Email addresses and mobile telephone numbers

There are three fields on the worksheet marked, "Hospital or Attendant Use Only":

- Complications and Procedures of Pregnancy and Concurrent Illnesses
- Complications and Procedures of Labor and Delivery
- Abnormal Conditions and Clinical Procedures Related to the Newborn

These three fields are required for births attended by a physician or professionally licensed midwife or certified nurse-midwife. This information is not required if the parents are registering the birth.

The information regarding Women, Infants & Children (WIC), average number of cigarettes/packs per day, birth parent prepregnancy and delivery weight, birth parent height, and APGAR score marked under "Medical and Health Data: Birth Parent and Newborn" will not be transcribed onto the actual birth certificate.

# Who collects the information on the birth certificate?

The birth certificate information is collected by the local health department who prepares the birth record and transmits it to the California Department of Public Health - Vital Records. State registered birth certificate information is then sent to the National Center for Health Statistics, Centers for Disease Control and Prevention.

### How is the information on the birth certificate used?

The information collected is used to record what happened during pregnancy, labor and delivery, and any issues the newborn experienced. The information will be used to understand and help prevent birth defects, preterm births, maternal deaths, and other labor, delivery and birth outcomes. Information collected also assists local and state public health leaders in making decisions that address programs needed in the community such as diabetes care, teen pregnancy, WIC, etc.

# How can I obtain a certified copy of the birth certificate?

You will not automatically receive a copy of your baby's birth certificate. Once the birth is registered, you can purchase a certified copy of the birth certificate from the local registrar or County Recorder in the county where your child was born, or from CDPH-VR. The fees and processing times may vary between these offices.

## How can I obtain a Social Security number for my child?

The Social Security Administration guidance limits the Enumeration at Birth program to hospital births. You can request a Social Security number for your child by contacting the nearest Social Security office. There is never a charge for a Social Security number and card from the Social Security Administration. For more information about Social Security, contact your nearest Social Security Office or call (800) 772-1213 (toll-free). You can also visit <u>Social Security's website</u> (https://www.socialsecurity.gov/).

**Amendments** 

(https://www.cdph.ca.gov/Programs/CHSI/Pages/Correcting-or-Amending-Vital-Records.aspx)

<u>Processing Times</u> (https://www.cdph.ca.gov/Programs/CHSI/Pages/Vital-Records-Processing-Times.asp)

# What You Need to Know about Your Child's Birth Certificate

# Your child's birth certificate lasts forever. Please be certain the information on the certificate is accurate and complete before you sign it.

- The birth certificate is a legal document.
- An amendment form is required to make corrections to the birth certificate.
- The birth certificate will become a <u>two-page document</u> if an amendment is requested after the original has been processed.
- Many changes on the birth certificate <u>require the applicant to go to court</u> for a court order, including reversing the order of last names (surnames).
- Parents may have problems receiving benefits, traveling on an airline, or obtaining a passport or Social Security Number (SSN) for their child if the birth certificate is not true and correct.
- It can take several weeks to apply an amendment. The <u>processing time</u> for amendments can be located on the California Department of Public Health-Vital Records website (https://www.cdph.ca.gov/Programs/CHSI/Pages/Vital-Records-Processing-Times.aspx).

# Common mistakes that require amendments or court orders:

- Misspelled first, middle, or last names of child and/or parents
- Incorrect birth place or date of birth of parent(s)
- Reversed order of last names (surnames)
- Adding additional names to parent(s) or child later
- Incorrect sex of child
- Incorrect birth date

Errors on birth certificates <u>cannot</u> be corrected on the original certificate.

The **original** birth certificate **does not** change, but an amendment is attached to create a **two-page** document.

✓ Parents, please review the information on the birth certificate carefully before you sign it.

✓ Your signature confirms that you have reviewed the information and that the facts are correct.

Amendment forms may be obtained at the local health department or county recorder's office, or <u>online</u> (https://www.cdph.ca.gov/Programs/CHSI/Pages/Correcting-or-Amending-Vital-Records.aspx).

California Department of Public Health – Vital Records

October 2022

# What You Need to Know about Data Collected from Your Child's Birth Certificate

Why is birth certificate information collected?

Is birth certificate information confidential?

What is birth certificate information used for?

Do I have to provide all information?

Who collects birth certificate information?

I still have questions...

The birth certificate information is collected based on California Health and Safety Code (HSC) sections 102425 and 102426. This law lists all of the information required on the California birth certificate. This law also makes **all medical information confidential**.

All medical information, including parents' race, education, occupation, SSNs, and address, is considered confidential and is not released to the public. Access to the confidential portion of the birth certificate is limited to the California Department of Public Health, California Department of Health Care Services, California Department of Finance, ScholarShare Investment Board, local health department, persons with a valid scientific interest as determined by the State Registrar, Committee for Protection of Human Subjects, parent who signed the certificate or parent giving birth, the child named on the birth certificate, and the hospital responsible for preparing and submitting the birth record (Reference HSC 102430). This packet identifies the pages that contain confidential data collected from the parents at the top of the pages.

The information collected is used to record what happened during pregnancy, labor and delivery, and any issues the newborn experienced. The information will be used to understand and help prevent birth defects, preterm births, maternal deaths, other labor and delivery outcomes, and public health programs.

All information is required by law with the exception of the parents' race, occupation, education, and SSNs. Although not required, reporting information about your race, occupation, and education helps public health programs to succeed. Without information, we cannot effectively develop public health programs to treat gestational diabetes, assist with teen pregnancies, manage services for Women, Infants & Children (WIC), and so much more.

Birth certificate information is collected by the birth clerk. It is then securely sent to the local health department, then to the California Department of Public Health - Vital Records for registration, and finally sent to the National Center for Health Statistics within the Centers for Disease Control and Prevention. If parents request an SSN for their newborn, then non-medical information as well as parent SSN (if listed) and address of where SSN card should be sent are forwarded to the Social Security Administration. Scholarshare information is collected solely for the purposes and use of the Scholarshare program.

Please contact the California Department of Public Health - VitalRecords at (916) 445-2684.

### CERTIFICATES OF LIVE BIRTH AND FETAL DEATH—MEDICAL DATA SUPPLEMENTAL WORKSHEET (Continued)

#### Item 30 (Birth) Item 34 (Fetal Death)

COMPLICATIONS AND PROCEDURES OF LABOR AND DELIVERY (Enter up to 9 codes, separated by commas, for the most important complications/procedures.)

### ONSET OF LABOR

- 10 Premature rupture of membranes (greater than or equal to 12 hours)
- 07 Precipitous labor (less than 3 hours)
- 08 Prolonged labor (greater than or equal to 20 hours)

### CHARACTERISTICS OF LABOR AND DELIVERY

- 11 Induction of labor
- 12 Augmentation of labor
- 32 Non-vertex presentation
- 33 Steroids (glucocorticoids) for fetal lung maturation received by the mother prior to delivery
- 34 Antibiotics received by the mother during labor
- 35 Clinical chorioamnionitis diagnosed during labor or maternal temperature greater than or equal to 38°C (100.4°F)
- 19 Moderate/heavy meconium staining of the amniotic fluid
- 36 Fetal intolerance of labor such that one or more of the following actions was taken: in-utero resuscitative measures, further fetal assessment, or operative delivery
- 37 Epidural or spinal anesthesia during labor
- 25 Mother transferred for delivery from another facility for maternal medical or fetal indications

### COMPLICATIONS OF PLACENTA, CORD, AND MEMBRANES

- 38 Rupture of membranes prior to onset of labor
- 13 Abruptio placenta
- 39 Placental insufficiency
- 20 Prolapsed cord
- 17 Chorioamnionitis

#### MATERNAL MORBIDITY

- 24 Maternal blood transfusion
- 40 Third or fourth degree perineal laceration
- 41 Ruptured uterus
- 42 Unplanned hysterectomy
- 43 Admission to ICU
- 44 Unplanned operating room procedure following delivery

#### NONE OR OTHER COMPLICATIONS/PROCEDURES NOT LISTED

- 00 None
- 31 Other Labor/Delivery Complications/Procedures not Listed

# Item 31 (Birth) ABNORMAL CONDITIONS AND CLINICAL PROCEDURES RELATING TO THE NEWBORN Item 35 (Fetal Death) ABNORMAL CONDITIONS AND CLINICAL PROCEDURES RELATING TO THE FETUS (Enter up to 10 codes, separated by commas, for the most important conditions/procedures.)

#### CONGENITAL ANOMALIES (NEWBORN OR FETUS)

- 01 Anencephaly
- 02 Meningomyelocele/Spina bifida
- 76 Cyanotic congenital heart disease
- 77 Congenital diaphragmatic hernia
- 78 Omphalocele
- 79 Gastroschisis
- 80 Limb reduction defect (excluding congenital amputation and dwarfing syndromes)
- 28 Cleft palate alone
- 29 Cleft lip alone
- 30 Cleft palate with cleft lip
- 57 Down's Syndrome—Karyotype confirmed
- 81 Down's Syndrome—Karyotype pending
- 82 Suspected chromosomal disorder—Karyotype confirmed
- 83 Suspected chromosomal disorder—Karyotype pending
- 35 Hypospadias
- 88 Aortic stenosis
- 89 Pulmonary stenosis
- 90 Atresia
- 62 Additional and unspecified congenital anomalies not listed above

#### ABNORMAL CONDITIONS (NEWBORN OR FETUS)

66 Significant birth injury (skeletal fracture(s), peripheral nerve injury, and/or soft tissue/solid organ hemorrhage which requires intervention)

# ADDITIONAL ABNORMAL CONDITIONS/PROCEDURES (NEWBORN ONLY)

- 71 Assisted ventilation required immediately following delivery
- 85 Assisted ventilation required for more than 6 hours
- 73 NICU admission
- 86 Newborn given surfactant replacement therapy
- 87 Antibiotics received by the newborn for suspected neonatal sepsis
- 70 Seizure or serious neurological dysfunction
- 74 Newborn transferred to another facility within 24 hours of delivery

# NONE OR OTHER ABNORMAL CONDITIONS/PROCEDURES NOT LISTED

- 00 None (Newborn or Fetus)
- 75 Other Conditions/Procedures not Listed (Newborn Only)
- 67 Other Conditions/Procedures not Listed (Fetal Death Only)

### EPIDEMICS AND/OR DISASTERS

- 91 COVID-19 Confirmed
- 92 COVID-19 Presumed
